- ✓ initial assembly in the factory

Kobito - the new product line for toddlers aged 0 to 5 years!

Playing is the most important activity for toddlers, which fulfills many functions for their development: emotional consolidation, social behaviour, motorical development and cognitive skills. Every skill learned by a child (such as crawling, standing and walking) creates playing opportunities.

To encourage children's development in a playful way, Spiel-Bau and the Creative Atelier designed the new product line for toddlers - „Kobito“.

„Kobito“ (a Japanese word for „the little ones“) is inspired by cute villages and small dwellings.

The combination of arches made of high-quality stainless steel with many different elements made of HPL and robinia invites toddlers into a play world that stimulates their imagination and creativity, as well encouraging them to rediscover this world again and again.

Playhouses, sand play equipment, climbing combinations and many opportunities for role playing make the Kobito series so interesting.

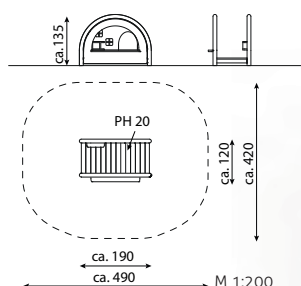

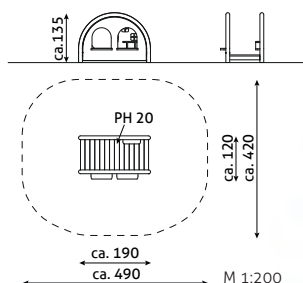

KOBITO PLAY HOUSE »TOLA« N° 10.2101

- Kobito wall I5
- Kobito wall O6 with counter
- square platform, 90x180 cm
- play shelf

KOBITO PLAY HOUSE »KUMO« N° 10.2111

- Kobito wall E5
- Kobito wall L6 with 2 counters
- square platform, 90x180 cm
- play shelf

KOBITO PLAY HOUSE »PUCA« N° 10.2201

- Kobito wall B6 with counter
- Kobito wall I5
- square platform, 90x180 cm
- hexagon platform, halved, 78x180 cm
- 2 posts made of stainless steel
- play shelf

KOBITO PLAY HOUSE »MOLI« N° 10.2211

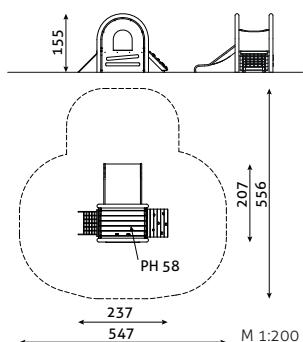

- Kobito wall I5
- Kobito wall C5
- square platform, 90x180 cm
- hexagon platform, halved, 78x180 cm
- 2 posts made of stainless steel
- play shelf

The space itself is an active play tool. Small rooms such as houses are important play and meeting places for all age groups and often entice children to role-play and fantasy play. Play houses create the feeling of nest warmth for children and offer opportunities to hide and crawl.

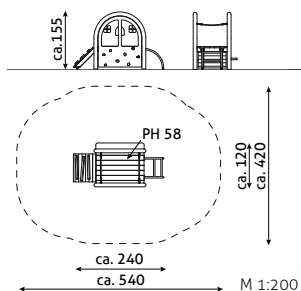

KOBITO PLAY COMBINATION »KULI« N° 10.2301

- Kobito wall F2 with climbing aids
- Kobito arch
- square platform, 90x127 cm
- climbing ramp with climbing grips
- wide slide made of stainless steel
- inclined climbing net
- 2 safety ropes

KOBITO PLAY COMBINATION »TAKO« N° 10.2311

- Kobito wall K2.b with counter
- Kobito wall N2 with climbing grips
- square platform, 90x127 cm
- arch ladder
- climbing ramp with climbing aids
- 2 safety ropes

KOBITO PLAY COMBINATION »KUKO« N° 10.2411

- Kobito wall D1.a
- Kobito wall D2 with climbing holes
- square platform, 90x127 cm
- Kobito chicken ladder
- safety rope
- arch bridge with safety ropes
- Kobito arch
- Kobito wall D3 with climbing aids
- square platform, 90x127 cm
- climbing wall with climbing grips
- wide slide made of stainless steel
- safety rope

KOBITO PLAY COMBINATION »MADO« N° 10.2401

- Kobito wall M2 with climbing grips
- Kobito wall M3 with climbing holes
- square platform, 90x127 cm
- arch ladder
- safety rope
- rope bridge with wooden walkway
- Kobito wall F1.a
- Kobito wall K2.a with counter
- square platform, 90x127 cm
- giraffe's road Mado
- safety rope

Activities such as balancing and climbing enable children to control their bodies, maintain balance, and feel their body as a whole. As a result, they not only develop their gross and fine motor skills, but also gain courage and dexterity.

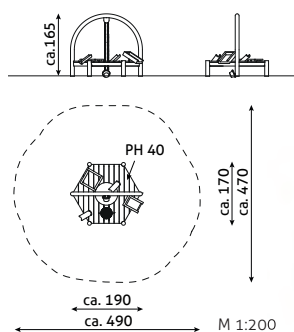

KOBITO PLAY COMBINATION »KULI« - N° 10.2301 IN BIELEFELD

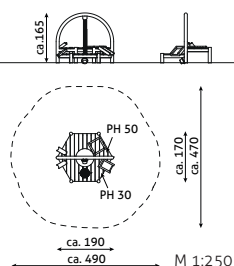

KOBITO SAND PLAY »TAMA« N° 10.3101

- Kobito arch
- 4 posts made of stainless steel
- hexagon platform with hole, 170x180 cm
- sand lift with bucket
- mud frame
- 2 sand chutes
- square sand chute
- sieve in the platform

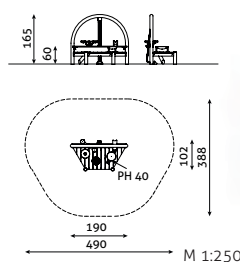

KOBITO SAND PLAY »KAMI« N° 10.3111

- Kobito arch
- 6 posts made of stainless steel
- 2 hexagon platforms, halved and with hole, 78x180 cm
- sand lift with bucket
- 2 sand chutes
- mud frame
- square sand chute
- sieve in the platform

KOBITO SAND KITCHEN »TOMI« N° 10.3201

- Kobito arch
- 2 posts made of stainless steel
- hexagon platform, halved 78x180 cm
- HPL wall with counter
- sand lift with bucket
- sand libra
- sand chute
- cooking spot
- sieve in the platform
- sand sink

KOBITO SAND HOUSE »MADA« N° 10.3301

- Kobito wall E
- Kobito wall I
- 2 posts made of stainless steel
- square platform, 90x180 cm
- hexagon platform, halved, 78x180 cm
- play shelf
- sand chute
- sand bucket with chain
- sieve in the platform

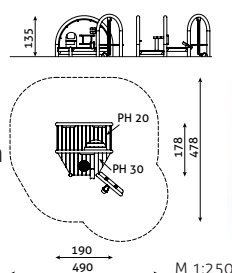

KOBITO SAND KITCHEN »YUKA« N° 10.3211

- Kobito arch
- 6 posts made of stainless steel
- 2 hexagon platforms, halved and with holes, 78x180 cm
- 2 HPL-walls with counter
- sand lift with bucket
- cooking spot
- sand sink
- sand chute
- sieve in the platform
- sand libra

KOBITO SAND HOUSE »KUMI« N° 10.3351

- Kobito wall C6 with 2 benches
- Kobito wall H5
- 1 posts made of stainless steel
- square platform, 90x180 cm
- hexagon platform, halved, 78x180 cm
- table, half-round
- play shelf
- sand chute
- sieve in the platform
- Kobito arch with sand lift and sieve-playboard

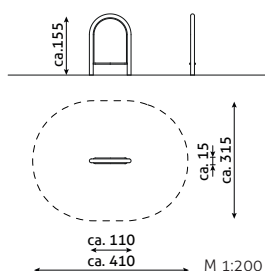

Sand is a wonderful thing, because almost everyone has fun playing in the sand - regardless of age group! It is a good tool for young children to develop fine motor skills and hand-eye coordination. KOBITO sand houses and sand kitchens also invite children to role-play.

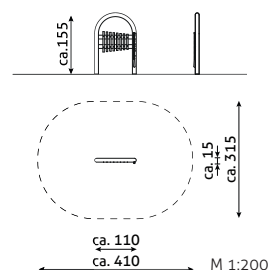

»KOBITO BLACK BOARD« N° 10.3721

- arch made of stainless steel
- black board made of HPL on both sides
- crayon tray made of robinia

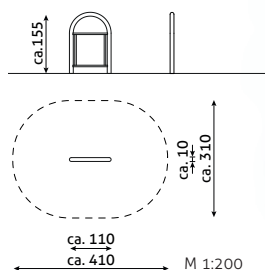

»KOBITO CHIME« N° 10.3701

- arch made of stainless steel
- chime with clapper

»KOBITO ILLUSION MIRROR« N° 10.3705

- arch made of stainless steel
- frame made of robinia
- illusion mirror with concave and convex side

»KOBITO MATERIAL BOARD« N° 10.3711

- arch made of stainless steel
- HPL-plate as play of color and light for getting to know different basic shapes and materials (such as acrylic glass, robinia and stainless steel)

»KOBITO ROTARY DISCS« N° 10.3715

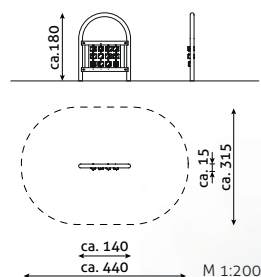

- arch made of stainless steel
- HPL-plate
- 2 rotary discs in different heights on both sides

Second rotary disc
on the backside!

»KOBITO MEMORY« N° 10.3725

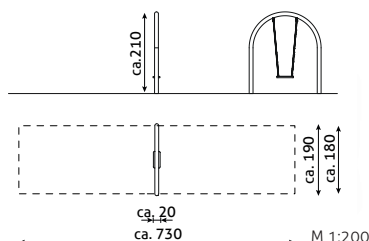

- arch made of stainless steel
- frame made of robinia
- 4 stainless steel struts
- 12 robinia cubes with motives made of HPL

Toddlers learn with all their senses right from the start. The combination of sensory games promotes this development through visual, acoustic and haptic impressions and stimulates the children's activity. Devices such as memory or the abacus train not only haptic impressions but also the logical thinking skills of children.

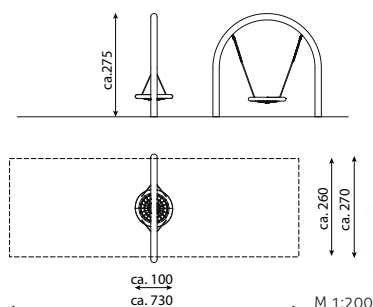

»KOBITO SINGLE SWING« N° 10.6001

- total height ca. 210 cm
- swing height ca. 195 cm
- arch made of stainless steel
- 2 unipivot points
- 1 pair of swing chains made of stainless steel
- safety swing seat

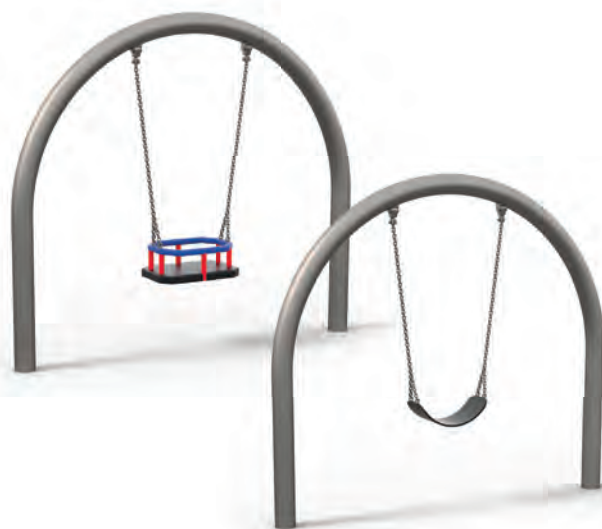

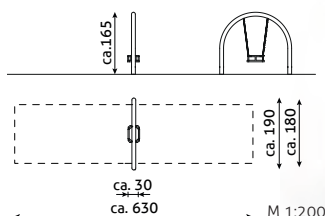

»KOBITO NEST SWING« N° 10.6031

- total height ca. 275 cm
- swing height ca. 210 cm
- arch made of stainless steel
- 2 unipivot points
- 1 pair of swing chains made of stainless steel
- nest, Ø = 90 cm

»KOBITO TODDLER'S SWING« N° 10.6011

- total height ca. 165 cm
- swing height ca. 150 cm
- arch made of stainless steel
- 2 unipivot points
- 1 pair of swing chains made of stainless steel
- toddler safety swing seat

»KOBITO BELLY SWING« N° 10.6021

- structure like Kobito toddler's swing, with belly belt instead of swing seat

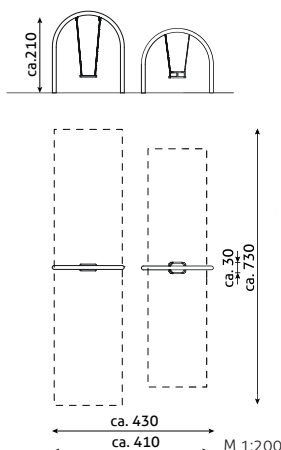

swinging

suggested age group

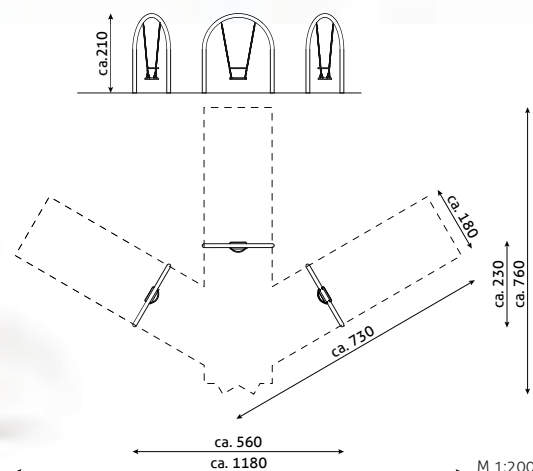

»KOBITO SWING COMBINATION« N° 10.6001+10.6011

- total height ca. 210 cm / 165 cm
- swing height ca. 195 cm / 150 cm
- 2 arches made of stainless steel
- 4 unipivot points
- 2 pairs of swing chains made of stainless steel
- safety swing seat
- toddler safety swing seat

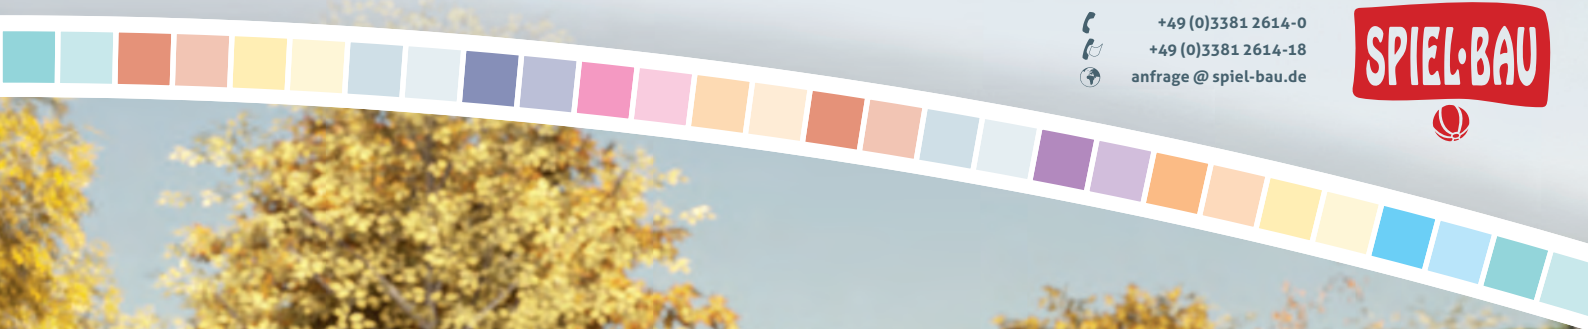

»KOBITO MEETING SWING, TRIPLE« N° 10.6051

- total height ca. 210 cm
- swing height ca. 195 cm
- 3 arches made of stainless steel
- 6 unipivot points
- 3 pairs of swing chains made of stainless steel
- 3 safety swing seats

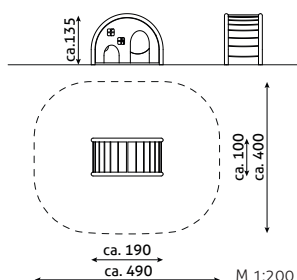

The rhythmic movements while swinging create a sense of balance, depth sensitivity and train the visual and spatial perception. Swing combinations and nest swings allow several children to swing at the same time. This encourages group dynamics and community play.

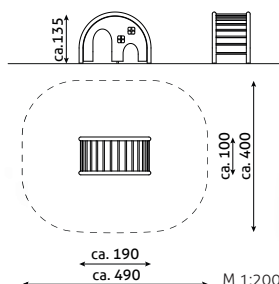

KOBITO CLIMBING HOUSE »MINO« N° 10.7101

- Kobito wall B5
- Kobito wall J5
- climbing ropes following the arch

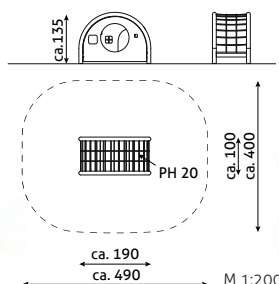

KOBITO CLIMBING HOUSE »NEKO« N° 10.7121

- 2 Kobito walls J5
- stainless steel bars following the arch

KOBITO CLIMBING HOUSE »MOYA« N° 10.7141

- Kobito wall I5
- Kobito wall C5
- square platform, 90x180 cm
- climbing net following the arch

Children start climbing before they can walk.
When climbing, balance and coordination of the whole body are trained. Success also leads to courage and self-confidence.

- arch with vertical climbing net
- rope harp

KOBITO CLIMBING VILLAGE »MULA« N° 10.7351

- Kobito wall L6 with 2 counters
- Kobito wall I5
- square platform, 90x180 cm
- play shelf
- balance beam with safety rope
- Kobito wall J5
- Kobito wall G6 with climbing aids
- stainless steel bars following the arch
- balance and safety rope
- Kobito wall G7 with climbing holes
- Kobito wall J5
- climbing net following the arch
- rope harp
- giraffe's road Mula

suggested age group

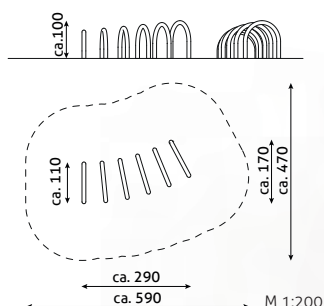

Balance and coordination are necessary for various movements and skills. The sense of balance can be trained with fun on the Kobito climbing combinations. The various arrangements promote several physical abilities.

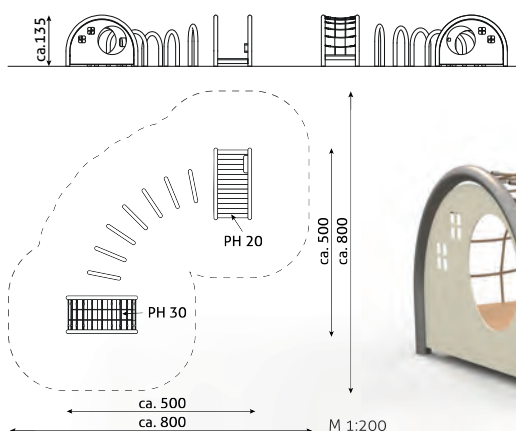

»KOBITO TUNNEL« N° 10.2801

- 7 Kobito arches in different heights
- arranged in a row, slightly rotated

KOBITO TUNNEL COMBINATION »KUNE« N° 10.2821

- Kobito wall E5
- Kobito wall C5
- square platform, 90x180 cm
- climbing net following the arch
- 10 Kobito arches in different heights
- Kobito wall C5
- Kobito wall E5

KOBITO TUNNEL COMBINATION »KAKU« N° 10.2841

- Kobito wall I5
- Kobito wall C5
- square platform, 90x180 cm
- stainless steel bars following the arch
- L-shaped tunnel made of stainless steel with 2 windows made of acrylic glass
- Kobito wall C5
- Kobito wall I5
- 2 posts made of stainless steel
- square platform, 90x180 cm
- 2 hexagon platforms, halved, 78x180 cm
- play shelf
- sand chute
- sand bucket with chain

Crawling is the first method of movement that expands the world of toddlers. Reaching something becomes the motivation. This movement leads to the development of muscles, coordination of the whole body and self-confidence. Crawling in or through the tunnel is always an adventure!

KOBITO TUNNEL COMBINATION »POCO« N° 10.2861

- Kobito wall I5
- Kobito wall B5
- square platform, 90x180 cm
- climbing ropes following the arch
- tunnel made of perforated stainless steel
- Kobito wall E5
- Kobito wall L6 with 2 counters
- square platform, 90x180 cm
- play shelf
