

Spiel-Bau GmbH, Alte Weinberge 21, D 14776 Brandenburg an der Havel

MAINTENANCE GUIDELINES

Valid for all Spiel-Bau GmbH products

A = weekly

B = monthly

C = quarterly

D = annually

☐ Visual routine inspection ☒ operational inspection

		A	B	C	D
1.	Check ground in falling and sliding area for hard objects and exposed footing.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Check stability: Try to move or tilt the playground equipment to ensure stability	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3.	Check moving metal parts (joints, springs ect.) for ease of movement and deterioration, replace if need be. Greasing of hinges is unnecessary, as we only use maintenance-free ball or metal roller bearings.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4.	Check all connetion elements and fittings for deterioration and tight fit; tighten if necessary. Replace damaged parts.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
5.	Check all additional parts such as chains, ropes, nets etc. for damage and renew if necessary.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
6.	Check rubber party, collars ect. for deterioration or damage, replace if necessary.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7.	Check surfaces of wooden parts for damage, caused by weather or external force and repair or replace if necessary.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
8.	Check surfaces of plastic and metal party, e.g. slides, for damage and replace if necessary.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
9.	Check foundations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

It is particularly important to carry out all the **checks and maintenance works** in the stated time because deterioration by usage, weather or wanton destruction causes a loss of safety and functionality. Following assembly of the unit all screwed fastenings should be checked after 4 weeks.

The bearing cup should be cleaned once a year (especially if the fall protection is loose).

We advise to examine the play equipment every year by an independent expert.

However, special conditions at an installation site can considerably restrict these intervals. If the products are set up in particularly busy locations or leisure parks where they are used almost continuously and/or are particularly exposed to vandalism, inspections must be carried out more frequently.

Defects affecting the **safety** of the unit have to be acted upon immediately, either by immediate repair or disassembly respectively closure of the unit.

All defects affecting the **functionality** diminish the playing value of the unit and encourage vandalism which in turn may lead to a loss of safety.

Immediate repair is necessary. Maintenance and repairs may only be carried out by a specialist.

We would like also to point out that all damage caused by omitted or inappropriate maintenance or Repairs are not covered by our warranty. Our service team will repair all damages after separate contract.
